Technology Project Management / Information Systems Analysis & Implementation / Product Management

Professional Summary

4th-year Industrial Engineering & Management student. Proven ability to build and implement tech solutions, targeting junior roles in Project Management, PMO, and Product.

Core Skills & Technologies

- **Management, Systems & BI:** PMO, MS Project, Requirements Analysis, Functional Specifications, Process Mapping, MVP Development, SAP ERP, Advanced Excel, Tableau.
- **Development, AI & Data Science:** Python, JavaScript, SQL, HTML5, Streamlit, AutoGen Studio, Claude Code, ChatGPT, Agentic Workflows, Random Forest, XGBoost.
- **Tools, APIs & Hardware:** GitHub, Netlify, Google Sheets API, Dashboard Development, Arduino, Microcontrollers, AutoCAD, SolidWorks.

Selected Technology Projects

Digital Workforce Planning System | *Python, JS, HTML5, Netlify, GitHub*

- Developed an operational scheduling system utilized by three military companies.
- Reduced personnel assignment time from half a day to 30 minutes using recommendation logic and automated reporting.

Shared Facility Management Platform | *Python, Streamlit*

- Built a centralized resource management application for 49 active users, featuring role-based access and conflict prevention.
- Replaced manual WhatsApp coordination to significantly improve transparency and usage monitoring.

Multi-Agent AI Data Analyst | *AutoGen Studio, Python, LLMs, Streamlit*

- Designed a multi-agent workflow to completely automate data analysis, chart generation, and business insight reporting.

Workplace Risk Prediction (Capstone) | *Python, Random Forest, XGBoost*

- Executed an end-to-end data science process to develop an MVP dashboard for workplace accident risk prediction and visualization.

Experience & Leadership

Afeka Academic College | *Teaching Assistant, Arduino I* (2026–Present)

- Evaluate Python, HTML5, and Arduino projects, focusing on code quality, hardware–software integration, and structured feedback.

Active Reserve Service | *Combat and Rescue Platoon Commander*

- Lead field teams in dynamic environments, managing mission planning, operational logistics, and workforce organization under pressure.

Buzzr | *Distribution Route Planner* (2021–2023)

- Optimized distribution routes by analyzing operational constraints to improve efficiency, resource utilization, and customer service levels.

Education

- **B.Sc. Industrial Engineering & Management** – Afeka Academic College of Engineering (2022–Present)
- **Practical Engineer Diploma (IE&M)** – Tel Aviv College of Practical Engineering (2019–2020)

Languages: Hebrew (Native) | English (Full Professional Proficiency)
